ALI RAZA

Digital Solutions Specialist | AI & Digital Transformation | Product Management | Business Analysis | Project Delivery

+92-314-5281939 | aleerazaa30@**gmail**.com | **linkedin**.com/in/engraliraza1 | **Rawalpindi**, Pakistan

PROFESSIONAL SUMMARY

Digital solutions and technology professional with 5+ years of experience across project management, business process improvement, technology consulting, and AI-enabled product development. Experienced in translating business requirements into technical solutions, coordinating cross-functional teams, designing digital workflows, and driving technology implementation. Practical exposure to Generative AI, Large Language Models (LLMs), RAG, AI agents, workflow automation, APIs, and data analytics. Passionate about leveraging emerging technologies to solve real-world problems and accelerate digital transformation.

Skill Set

Digital Solutions & Product Development

- **Digital Product Development:** Digital solution planning, product requirements, feature prioritization, solution design, implementation coordination, continuous improvement.
- **Business Analysis:** Requirements gathering, business process mapping, functional specifications, user stories, acceptance criteria, workflow documentation.

Technical Solution Delivery

- **Technical Coordination:** Cross-functional engineering coordination, technical requirements, solution validation, testing, defect tracking, deployment readiness.
- **Technology Integration:** REST APIs, system integrations, data flows, application architecture, cloud infrastructure, technical feasibility assessment.

Technical Documentation & Process Management

- **Documentation:** BRDs, functional specifications, SOPs, process flows, technical documentation, project plans, governance records.
- **Performance & Reporting:** KPI monitoring, progress reporting, analytical dashboards, quality assurance, continuous improvement.

AI & Emerging Technologies

- **AI Solutions:** Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI agents, prompt engineering, intelligent automation.
- **AI Application Development:** Conversational AI, knowledge management, document processing, AI-powered workflows, solution evaluation and validation.

Project, Agile & Stakeholder Management

- **Project Delivery:** End-to-end project coordination, SDLC, project planning, milestone tracking, dependency management, risk and issue resolution.
- **Agile & Stakeholders:** Agile/Scrum, sprint coordination, stakeholder engagement, requirements prioritization, UAT, solution demonstrations.

Tools & Technologies

- **Project & Collaboration:** Jira, Microsoft Project, Microsoft 365, Advanced Excel, Power BI.
- **AI & Development:** Python, Django, Django REST Framework, LangChain, LangGraph, n8n, PostgreSQL, Docker, Microsoft Azure.

PROFESSIONAL EXPERIENCE

Product Coordinator – Digital & AI

VEYN AI, Islamabad

Veyn AI is an AI solutions company specializing in intelligent workflow automation, generative AI, custom AI agents, and business process optimization using Large Language Models (LLMs) and modern automation platforms

Oct – 2025 – To Date
Islamabad

- Coordinate cross-functional delivery of AI-driven solutions involving **Product, Engineering, Operations, and Business stakeholders**, supporting initiatives from requirements through deployment.
- Coordinate AI/GenAI initiatives involving **LLM-based workflows, automation agents, data insights, and business process optimization**, aligning technical delivery with business requirements.
- **Designed and documented an SOP validation and quality evaluation workflow for call-center** QA, translating manual review criteria into a structured and governed process.

- **Evaluate AI/LLM pipeline outputs and automation-agent performance** to identify quality gaps, workflow issues, and opportunities for improvement.
- Translate digital and business requirements into **actionable workflows, process documentation, implementation activities, and delivery plans.**
- **Maintain Jira sprint boards**, KPI trackers, milestones, dependencies, and delivery dashboards to monitor initiative health and progress.
- **Facilitate Agile delivery activities** including sprint planning, retrospectives, progress tracking, and milestone coordination.

Project Coordinator – Data & Digital Transformation

Oct 2022 – Oct 2025

Islamabad

Blutech Consulting, Islamabad

Blutech Consulting delivers digital transformation, process automation, and enterprise IT solutions across banking and telecommunications.

- **Coordinated IT operations and infrastructure activities** across HBL, UBL and RawBank environments, tracking operational issues, dependencies, SLA compliance, and resolution timelines.
- **Analyzed operational datasets and system metrics to identify performance trends**, bottlenecks, exceptions, dependencies, and performance gaps, supporting data-driven decisions.
- **Designed and maintained Power BI dashboards** covering KPI, SLA, batch delivery, and system uptime metrics, improving decision-making speed by 35%.
- **Analyzed** production server storage, Hadoop cluster health, CDC latency, directory sizes, and system utilization metrics as part of daily operational reporting.
- **Coordinated incident analysis,** issue resolution, workflow automation, and process standardization, reducing recurring operational issues by approximately 70%.
- **Analyzed cross-system data integration workflows**, identified bottlenecks and dependencies, and implemented process improvements reducing operational inefficiencies by 30%.
- **Coordinated technical testing**, validation, defect tracking, stakeholder feedback, and deployment readiness across enterprise technology initiatives.
- **Supported project** planning through scope, timelines, milestones, dependencies, risks, issues, and mitigation actions.
- Used SQL to query, validate, and analyze operational data for issue investigation, reporting, root-cause analysis, and data-quality checks.
- **Maintained Jira-based action and issue trackers** along with SOPs, runbooks, governance documentation, and audit-ready operational records.

Project Coordinator – Telecom & Infrastructure

Sep 2021 – Oct 2022

Islamabad

Spine Engineering, Islamabad

Spine Engineering is a leading subcontracting company specializing in telecom deployments, site corrections, and network installations, working with major industry players like Nokia, Ericsson, and ZTE.

- **Led delivery of 3 large-scale telecom deployment projects** (microwave, wireless, power systems) achieving 95% on-time completion through rigorous planning and issue resolution.
- **Coordinated large-scale telecom deployment projects** with cross-functional engineering teams (12+ members), resolving technical issues and achieving 95%+ on-time delivery and 100% client acceptance.
- **Resolved on-site technical issues** across North Region proactively, minimizing downtime and maintaining service continuity for Nokia/Ericsson/ZTE deployments.
- **Achieved 100% client acceptance** on project closures by ensuring full vendor and internal team alignment throughout delivery.

EDUCATION & CERTIFICATIONS

- **B.E. Electrical Engineering**
  HITEC University, Taxila | 2016 – 2021
  Majors: Telecommunications
- **MSc Data Science**
  SZABIST University | 2024 – 2026
  (relevant coursework: Machine Learning, NLP, Statistical Analysis, Deep Learning)
- **Microsoft Certified: Azure Administrator Associate (2024)**

TECHNICAL SKILLS

Digital Solutions & Product Delivery	Digital Product Development, Solution Design, Feature Prioritization, Requirements Management, Implementation Coordination, Continuous Improvement
AI & Digital Transformation	Generative AI, LLM Concepts, RAG, AI Agents, Prompt Engineering, AI Workflow Automation, Conversational AI, Digital Transformation
Business Analysis & Technical Integration	Requirements Gathering, Business Process Mapping, User Stories, Acceptance Criteria, Functional Specifications, REST APIs, System Integration, Data Flows
Project & Agile Delivery	BRDs, Technical Documentation, SOPs, Process Flows, Project Reporting, KPI Monitoring, Change Control, Quality Assurance
Tools & Technologies	Jira, Microsoft Project, Power BI, Advanced Excel, SQL, Python, Django, REST Framework, LangChain, LangGraph, n8n, PostgreSQL, Microsoft Azure, Docker

KEY ACHIEVEMENTS

Improved Operational Decision-Making Through BI & Reporting

- Designed and maintained Power BI dashboards covering KPI, SLA, batch delivery, and system uptime metrics, **improving decision-making speed by 35%**.
- Improved operational visibility by consolidating performance metrics into structured dashboards and automated reporting workflows.

Automated Operational Reporting & Reduced Manual Effort

- Automated the **Start-of-Shift (SOS) operational report** by consolidating server, Hadoop, CDC, storage, and system health metrics into a centralized report.
- **Reduced manual reporting effort by approximately 45 minutes per day** through automated data collection and reporting.

Reduced Recurring Operational Issues

- Coordinated incident resolution, issue tracking, workflow automation, and process standardization, **reducing recurring operational issues by approximately 70%**.
- Identified cross-system bottlenecks and dependencies and implemented process improvements that **reduced operational inefficiencies by 30%**.

Delivered Large-Scale Projects & Stakeholder Outcomes

- Led and coordinated **3 large-scale telecom deployment projects**, achieving **95% on-time completion** through structured planning, issue resolution, and cross-functional coordination.
- Coordinated engineering teams of **12+ members** and achieved **100% client acceptance** across project closures.
